

Quins impactes té?

1 Earth

Dia de superació de la terra

1971 - 2025

1.8 Earths

The chart illustrates the progression of Earth Overshoot Day over time. The blue portion of each bar represents the period before the overshoot, while the red portion represents the period of overshoot. The x-axis labels are 1971, 1973, 1975, 1977, 1979, 1981, 1983, 1985, 1987, 1989, 1991, 1993, 1995, 1997, 1999, 2001, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, 2019, 2021, 2023, and 2025. The y-axis labels are January, February, March, April, May, June, July, August, September, October, November, and December. The chart shows that the overshoot has been occurring since the late 1970s, and the magnitude of the overshoot has increased significantly over the years, reaching a level equivalent to 1.8 Earths by 2025.

Què hi podem fer?

S'estima que ja hem sobrepassat 6 d'aquests 9 límits. Els darrers estudis indiquen que l'acidificació dels oceans està a punt de ser el setè.
